

Cat Care Guide 🐱

Thanks so much for looking after Chibi and Nana while I'm away!

Diet

- Feed 3–4 times a day. 6-8 am, 12pm, 6pm, 11pm (before bed). Timing isn't really a concern, quite random for me.
- Just make sure not overfeeding Chibi.
- Chibi: give him a thin layer only — he's a bit chubby.
- Nana: totally different story, she eats whenever she wants, no need to worry about her.
- They usually eat after playtime.
- Canned food: normally once a week, but feel free to give it to them more often while I'm gone.
- Clean water available.
- Treats: about once a day. Nana especially loves them and will skip her regular meals for treats, so go easy on her.

Play

- I usually play with them using a rubber band, kind of like playing fetch with a dog.
- Nana loves the cat wand/stick toy.
- If Chibi gets too clingy, you can switch on the automatic toy to keep him entertained.

Other Notes

- I brush them a couple times a day.
- Chibi usually goes to bed around 11pm.
- The human snacks in the kitchen are for you guys — please take them all, some are close to expiring and I won't eat them anyway.
- If you stop by my place for more cat litter, help yourself to any drinks too. My next Amazon delivery arrives 9/15.
- Probably worth to pay extra attention after cooking while the stove is hot.

Thanks again — text me anytime if anything comes up!
